SECTION II

Total time—2 hours

Question 1

(Suggested time—40 minutes. This question counts one-third of the total essay section score.)

Read the following two passages about Florida's Okefenokee Swamp carefully. Then write an essay in which you analyze how the distinctive style of each passage reveals the purpose of its writer.

Passage 1

**Okefenokee Swamp**, primitive swamp and wildlife refuge in southeastern Georgia and northern Florida, is a shallow, saucer-shaped depression approximately 25 mi wide and 40 mi long and covers an area of more than 600 sq mi. Lying about 50 mi inland from the Atlantic Coast, the swamp is bounded on the east by the low, sandy Trail Ridge, which prevents direct drainage into the Atlantic. The swamp is partially drained southward into the Atlantic by the Suwannee and St. Mary's rivers. The Okefenokee Swamp includes low, sandy ridges, wet grassy savannas, small islands (called hummocks) surrounded by marshes, and extensive "prairies," or dark water areas covered by undergrowth and trees. Vegetation is dense in the swamp and includes giant tupelo and bald cypress trees festooned with Spanish moss, brush, and vines: where sandy soil is above the water, pine trees predominate. Meandering channels of open water form an intricate maze. Exotic flowers, among them floating hearts, lilies, and rare orchids, abound. The swamp is populated with diverse and abundant wildlife, with about 175 species of birds and at least 40 species of mammals, which include raccoons, black bear, white-tail deer, bobcats, fox, and otter. Alligators are also present.

Passage 2

Vast and primeval, unfathomable, unconquerable, bastion of cottonmouth, rattlesnake and leech, mother of vegetation, father of mosquito, soul of silt, the Okefenokee is the swamp archetypal, the swamp of legend, of racial memory, of Hollywood. It gives birth to two rivers, the St. Mary's and the Suwannee, fanning out over 430,000 leaf-choked acres, every last one as sodden as a sponge. Four hundred and thirty thousand acres of stinging, biting and boring insects, of maiden cane and gum and cypress, of palmetto, slash pine and peat, of muck, mud, slime and ooze. Things fester here, things cook down, decompose, deliquesce. The swamp is home to two hundred and twenty-five species of birds, forty-three of mammals, fifty-eight of reptiles, thirty-two of amphibians and thirty-four of fish—all variously equipped with beaks, talons, claws, teeth, stingers and fangs—not to mention the seething galaxies of gnats and deerflies and no-see-ums, the ticks, mites, hookworms and paramecia that exist only to compound the misery of life. There are alligators here, bears, puma, bobcats and bowfin, there are cooters and snappers, opossum, coon and gar. They feed on one another, in the sludge and muck and on the floating mats of peat they bury eggs, they scratch and stink and sniff at themselves, caterwauling and screeching through every minute of every day and night till the place reverberates like some hellish zoo.
